PROFESSIONAL SUMMARY

Full-Stack Developer with a Bachelor's degree in Business Computer and hands-on experience building production-grade web applications across the MERN and Next.js/Supabase stacks. Skilled in designing secure REST APIs, implementing authentication and role-based access control, and building responsive, scalable user interfaces. Strong foundation in database design, system architecture, and end-to-end product delivery, with a growing focus on AI-integrated applications.

PROFESSIONAL EXPERIENCE

Full-Stack Web Development Intern — UNRWA Digital Hub, Beirut, Lebanon (Remote) June 2026 – Sep 2026

- Built and shipped full-stack web applications (including FitConnect and EatWise, detailed below) from initial design through deployment, working across front-end, back-end, and database layers.
- Collaborated within a development team under mentorship, participating in code reviews, technical discussions, and iterative feature delivery in a fast-paced, hands-on environment.
- Translated real-world product requirements into working software, strengthening skills in debugging, testing, and full project lifecycle ownership.

PROJECT EXPERIENCE

FitConnect — Personal Trainer Booking Platform | [GitHub](#) Jul 2026

- Built a full-stack booking platform (Next.js, PostgreSQL/Supabase) enabling clients to discover trainers, book sessions, and pay end-to-end, with a two-layer authorization system combining route guards and Row Level Security.
- Engineered real-time slot validation, dual-layer payment validation, and business-rule enforcement (reschedule limits, refund eligibility), plus role-specific client and admin dashboards.

EatWise — AI-Powered Personalized Meal Planning App | [GitHub](#) Jul 2026

- Built a full-stack MERN app integrating the Groq API (Llama 3.3 70B) to generate AI-personalized meal plans based on user health profiles, allergies, and goals.
- Designed a normalized MongoDB schema with BMR-based calorie calculations, JWT-secured role-based access, and an admin analytics dashboard using aggregation pipelines.

Rivo — Full-Stack E-Commerce & Inventory Management Platform | [GitHub](#) Aug 2025 – Jun 2026

- Built a full-stack e-commerce platform with React.js, Node.js, Express.js, and MongoDB, featuring separate customer and admin interfaces for authentication, product management, cart, and order processing.
- Implemented RESTful APIs with JWT authentication, role-based access control, and inventory management, alongside responsive UIs built with SCSS (BEM), Redux Toolkit, and Redux Saga.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Zustand, TanStack Query

Backend: Node.js, Express.js, Python, FastAPI, Django, RESTful APIs

Databases: MySQL, MongoDB, Mongoose, SQL, NoSQL

Authentication & Security: JWT, Authentication & Authorization, RBAC, Secure Cookies

AI: LLMs, Prompt Engineering, AI API Integration (Groq, OpenAI)

Testing: Jest, Vitest, Unit & Integration Testing

DevOps & Version Control: Git, GitHub, Branching, Pull Requests, Code Reviews, GitHub Actions, CI/CD, Cloud Deployment

Architecture: REST API Architecture, Clean Architecture, SOLID Principles, Design Patterns, Scalable System Design

Web & SEO: SSR, CSR, SSG, Core Web Vitals, SEO

LANGUAGES

Arabic — Native | English — Fluent / Professional Proficiency

EDUCATION

Bachelor of Science in Business Computer — Lebanese University 2019 – 2022
